

Appendix B: Study Codebook

Tab	Category	Description
Papers metadata	status	Status of publication in the analysis process (downloaded, reviewed, analyzed)
	Zotero key	Comes from Zotero exports and can be used to quickly find a publication in the database
	DOI	DOI of the publication
	author 1 last name	Last name of the first author
	author 1 first name or initial	First name or initial of the first author
	author 2 last name	Last name of the second author
	author 2 first name or initial	First name or initial of the second author
	author 3 last name	Last name of the third author
	author 3 first name or initial	First name or initial of the third author
	author 1 department	Department information if applicable and available
	author 2 department	Department information if applicable and available
	author 3 department	Department information if applicable and available
	author 1 institution	First author's institution
	author 2 institution	Second author's institution
	author 3 institution	Third author's institution
	author 1 country	Country where author's institution is located
	author 2 country	Country where author's institution is located
	author 3 country	Country where author's institution is located
	publication date	Year of the publication
	publication venue	Name of the publication venue

	available online or via open access	Whether this publication is available online without institutional subscription or via an open access journal (online, OA journal, both, other)
Papers	Paper ID	Paper unique code as <last-name et al year>
	IHCR is	Describe how is IHCR defined or conceptualized in this paper using a brief 3-5 word description
	area	Describe the domain(s) or areas of the paper (e.g., which disciplines or topics it covers)
	paper goal	Describe the main goal of the paper
	paper methods	Specify methods that were used in this paper (e.g., conceptual analysis, case study, survey, review)
	study participants	If the paper is empirical (defined as evidential in paper modality), describe study participants (number and major characteristics, could be non-human, e.g., documents), if not - see "actors" in the projects tab
	paper modality	Based on the "findings" or "results" section, what is the overall orientation of the paper? Normative (contains statements about what should be done), prospective (contains statements about what will be done), evidential (statements about how things are based on research), descriptive (statements about how things are without research evidence), possible (offering a proposal or a suggestion of how things can be, e.g., trying a framework), mixed (contains statements of more than 1 modality), other (if applicable, describe other modality)
	findings or recommendations	Describe the recommendations are proposed in this paper or summaries of what researchers (or other actors) do about IHCR (e.g., "researchers don't share data" or "use repositories" or none)
	conclusion	Summarize the main conclusion of the paper
	projects mentioned	Indicate whether specific projects are mentioned in the paper (y/n)
